Context and objectives

Mobilisation of RESAH on this project is affirmed by the strong will to :

Structure the purchase-
logistics process
between hospitals &
suppliers and encourage
electronic exchange of
information

Support the
dimensioning and
management of
reception and storage
areas for products

Anticipate the
digitalisation of product
information (UDI, public
procurement) and the
traceability of health
products (FMD)

Enable manufacturers to
share product information
in a simplified process
with a single GDSN
publication

Secure information
exchange procedure using
recognised international
standards

Our intention is to improve the accuracy and consistency of data across the different information systems in healthcare.

Meeting stakeholders' needs

Healthcare facilities

- ▶ Simplify access to updated and exhaustive product information (especially those under procurement agreements)
- ▶ Secure the medical device loop

Suppliers

- ▶ Control data transmitted to healthcare facilities
- ▶ Automate the secure transmission of updated data to all in 1 time
- ▶ Reduce data errors and receive order vouchers with recognised and updated codes

Solution providers

- ▶ Support interoperability of information systems
- ▶ Use standards
- ▶ Facilitate communication with suppliers and buyers

Furthermore, with a connexion to Resah purchasers portal, the database will enhance services attractiveness

eCAT Santé

- ❖ First French electronic catalogue for healthcare centers
- ❖ **eCat-Santé** is **interoperable** with business HIT
- ❖ Developed with @GP (PIM and Datapool)

A database fed by suppliers through

- GDSN network
- eCat Santé web portal for suppliers

Information available for hospitals, pharmacists, purchasing assistants and hospital logisticians

- eCat Santé website for healthcare centers
- through their financial management or pharmacy IS (interface)

Information available in eCat Santé

Product scope :

- Medicines and Medical Devices (2020)
- Food (2021)
- Other sectors (TBD)

Based on GS1 GDSN® standard

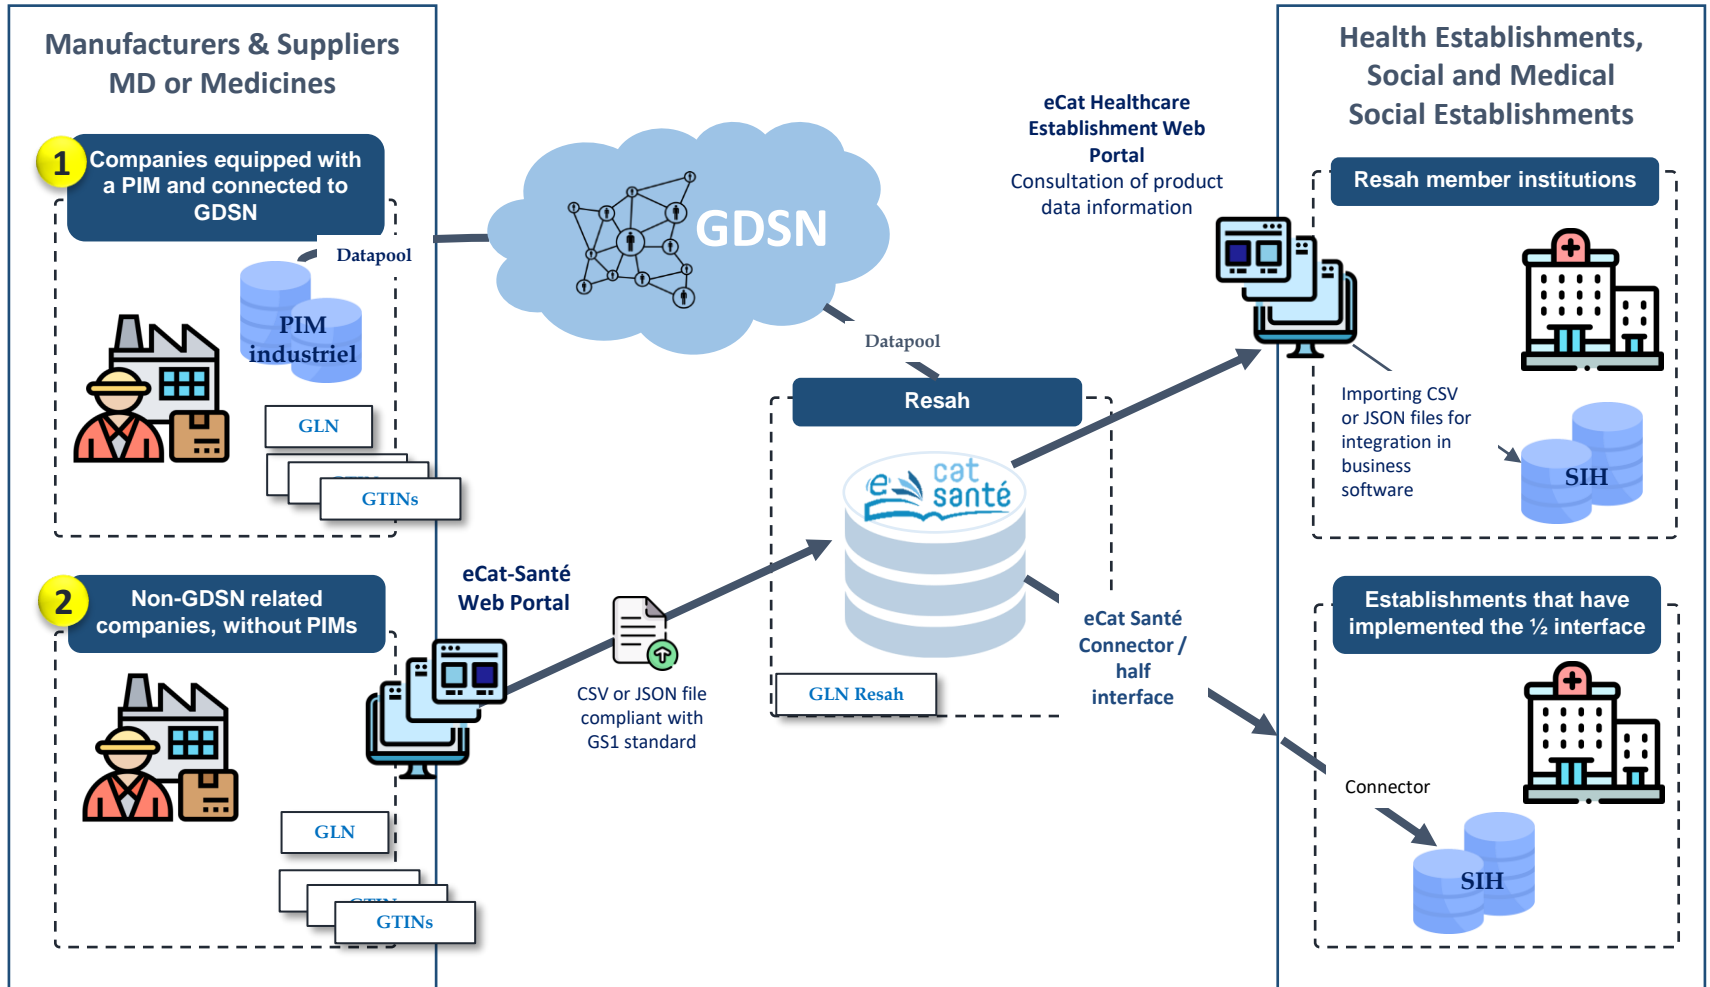

- [French national list of attributes for Medical Devices](#)
- [International list of attributes for Drugs](#)

Providers can feed eCat-Santé with product information

- Related to a public procurement contract with Resah (free)
- Or entire products catalogue (membership : 100 €/year for early enrolment)

Data quality is the responsibility of the manufacturer

eCat Santé operating mode

Next step and deployment

Manufacturers

- Ongoing test phases with 6 manufacturers (medical devices and medicines)
- eCat Santé will officially be available on **September 21st, 2020**
- Manufacturers can start feeding the catalogue as soon as it is launched !
- Incentives will be specified in upcoming call for tenders in order to encourage the use of the catalogue (and amendment for ongoing contracts)

Healthcare centers

- French hospitals can request access to the portal as of : ecatalogue@resah.fr
- Ongoing developments with HIT providers to enable them to use data directly into their IS.

Stay tuned and contact us

Upcoming information and users guide (21/09) will be posted on Resah website
<http://www.resah.fr/0/2/102>

ecatalogue@resah.fr

- Support and functional assistance
- Trainings upon eCat-santé (data model, regulation...)
- Assisting with functional tests
